Diluted products will have a different appearance due to carrier.

Packaging: 50 lb bags (F100215489)

Grow-Finish Performance Response Summary of 9 grow-finish trials:

- 2 commercial research farms
- 2 research centers
- 5 university farms

Pellet Stability

- Cinergy Life B3 survived pelleting at three temperatures (175°F, 185°F, and 195°F).

- Recovery was similar in high and low energy dense diets.

Recovery after pelleting (Pellet vs. Mash), %

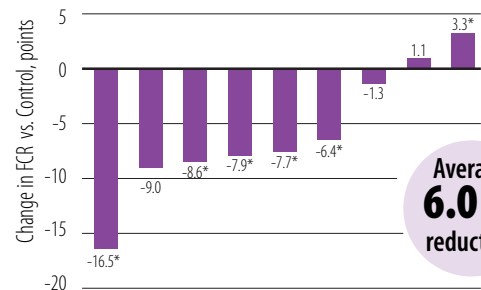

175° F	185° F	195° F
96.8	95.9	96.0

Meta-Analysis

- Pigs fed Cinergy Life B3 exhibited improved FCR compared to pigs fed the same diet without the DFM (P<0.01).
- Both diets were non-medicated.

Summary of FCR Response

*P<0.05

Average **6.0 pt** reduction
